1. Unscrew supplied wing nuts (2) on the bottom of the Scorpion base and mount base to fixture using wing nuts (2).

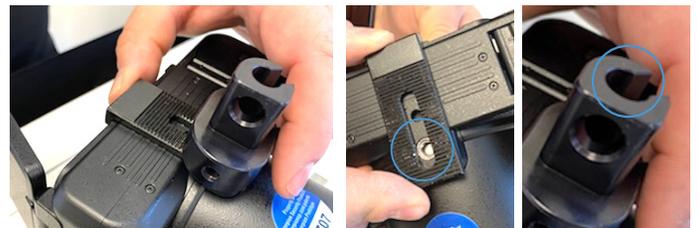

2. Once Scorpion base is mounted to fixture, find correct size mounting adapter.

**\*NOTE:** Find correct size mounting adapter by placing on bottom of camera ensuring lip of adapter is snug to camera

3. After plate size is chosen, place Scorpion body on top of adapter plate, ensuring holes line up.

4. With Scorpion body in place, secure by using supplied security key.

**\*NOTE:** Ensure both top and side of Scorpion body have been tightened

5. To complete installation, place Scorpion body inside base and lock using supplied key.
